Mythware Classroom Management

Optimized to provide a friendly, collaborative classroom solution, teaching and learning in an interactive style is the jumping-off point of Mythware Classroom Management Software. With enhanced performance and availability in an ever-expanding number of languages, Classroom Management is suitable for educators worldwide.

Designed with friendly and easy-operate interface, Classroom Management by Mythware will be easily accepted. It also has good compatibility and stability, which ensures the compatibility with other software and make sure the long time teaching process. And its performance in wireless environment is as good as wired environment.

Serving as a management platform for multimedia interactive teaching in computer classrooms, this classroom management software enables the teacher to control and manage the class effectively, supervise students’ activities and maintain a good order in class, and the students to learn, communicate and collaborate with each other and between groups.

Key Features
◎ Screen Broadcast
◎ Student Demonstration
◎ Net Movie
◎ Camera Broadcast
◎ Group Management
◎ Group/Topic Chat
◎ Group Teaching
◎ Monitor & Control
◎ Remote Command
◎ Remote Setting
◎ Quiz/Survey
◎ Quiz by Answer Sheet
◎ File Distribution
◎ File Collection/Submission
◎ Web/ Application Policy
◎ USB/CD/Printer Control
◎ Message/Event
◎ Silent On/Off
◎ Thumbnail View
◎ Auto Connection
Benefits of Classroom Management

“Classroom Management includes a range of features to support effective teaching and learning—supporting interactivity and collaborative work, and providing tools to organize lessons and assess student progress.”

Interactive Teaching & Learning
Classroom Management provides teachers with powerful functions to conduct interesting lessons and helps facilitate student interaction in the classroom. Classroom Management is purpose-built for 1:1 eLearning, teachers can finish all the education targets, and students can focus on learning both conveniently.

Group Collaboration
With Classroom Management, teachers can divide students into virtual groups and facilitate group collaboration. Designated group leaders can be granted additional capabilities. For instance, they may be permitted to share their screens and files with the other students in their groups. To enhance collaboration, teachers can also join groups to chat with students.

Effective Control & Assist
Classroom Management provides teachers with efficient tools to effective control the class and manage student work. The software allows teacher to view student screens and provide assistance remotely, as well as supports communication between teachers and students.

Assessment
Classroom Management has a practical set of features that allow teachers to assess student progress by creating and administering quiz papers. Teacher can also give students a survey comprised of a single question, which can be a useful tool for assessing individual learning during lectures and discussions.
Interactive Teaching & Learning

High-speed Screen Broadcast
- Broadcast the screen and voice of teacher side to students in real time.
- Record the process of screen change and voice of microphone of teacher side for after-class review.

Student Demonstration
- Display one student’s screen on teacher’s and other students’ computers to share their work.

File Management
- Distribute files to the specified folder of student side.
- Collect files from students’ computers at any time.
- Students can submit files to the teacher during class.

Multiple Voice Interaction
- Broadcast only voice to the selected students.
- Talk with the selected student by voice during class.
- Monitor the voice of student side in real time.

Message
- Teachers and students send messages to each other to enhance communication.

Camera
- Open the camera of teacher side and broadcast the camera image to students.

Net Movie
- Open media files on teacher side and broadcast it to the selected students.

Login Mode Management
- Students choose teacher to login.
- Students connect to the teacher in the same channel automatically.

NEW
Group Collaboration

Group Teaching
• Teachers can create groups and identify one active member of each group as group leader.
• Grant group leaders additional capabilities to help lead their groups.

Group Chat
• Teacher and students exchange information by message, drawing and microphone in the same group.

Topic Chat
• Teacher create several topics and students choose the topic to join in.

Effective Control & Assist

Monitor & Control
• Monitor the screen of students in a single view and assist them remotely.

Remote Command
• Startup, reboot and shut down student PCs by one click from teacher side.
• Launch application, close applications and open website of student side remotely.

Remote Settings
• Set some common functions like Display, Theme and so on of students remotely.
• Lock students' process to prevent them escaping from the class. ❄️
• Lock student screen after network connection is broken. ❄️

Silence
• Display a message on student PCs, mute their sound devices, and block their input devices simultaneously to get attention.

Student Policy
• Set different policies to control the use of web, application, USB, CD and printer of students.

Student Registration
• Students offer required information to get online lessons.
Assessment

Standard Quiz
• Create quiz paper with four different question types in real time or in advance.
• Distribute the quiz paper and start the quiz instantly.
• Get the score of each student after collecting all the quiz papers and send results to the students automatically.

Quiz by Answer Sheet
• Import the papers edited in other documents and create answer sheet to launch a quick test to students.
• Export the quiz result of the test and each student in the form of HTML.

Survey
• An instant quiz with only one question to check the learning effect of students in real time.
• Get the result immediately after time ends.
